SUMMARY

Full-stack developer with 2+ years of professional experience building and shipping responsive web applications and cloud-native services, mostly remote — SvelteKit, React and Next.js on the front end; Node.js and NestJS on the back end; PostgreSQL, MySQL and MongoDB for data; deployed on Google Cloud Platform and AWS with Docker and CI/CD. Increasingly focused on AI-assisted development and LLM integration, building agentic workflows with tools like Claude Code, Cursor and Codex.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python

AI & LLM: LLM integration (Claude, OpenAI), AI-assisted development (Claude Code, Cursor, Codex), AI agents & agentic workflows, prompt engineering

Frontend: Svelte, SvelteKit, React, Next.js, Astro, Angular, Tailwind CSS, shadcn/ui, Ionic, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, Flask, REST APIs, GraphQL, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLite

Cloud & DevOps: Google Cloud Platform, AWS, Docker, CI/CD, GitHub Actions, Git

Practices: Agile/Scrum, Software Architecture, REST & API Design, SEO

PROFESSIONAL EXPERIENCE

Full-Stack Developer, Keep Calm Services

Miami, USA · Remote | January 2025 – Present

- Build and maintain web applications and internal tools with SvelteKit and NestJS, TypeScript across the stack.
- Design RESTful APIs and database schemas for an internal CRM platform supporting core business workflows.
- Build and ship marketing sites in Astro and Next.js, tuned for SEO and performance.
- Containerize and deploy services on Google Cloud Platform (Cloud Run, Cloud SQL, Cloud Storage) with automated scaling.

Full-Stack Developer, Mas Alcance

Medellín, Colombia · Remote | November 2023 – October 2024

- Delivered multiple full-stack web and mobile applications end to end for commercial clients under tight deadlines.
- Built a hotel reservation platform (web and mobile) from the ground up.
- Developed parking-management applications featuring virtual wallets and automated payments.
- Implemented real-time chat with WebSockets and integrated thermal-printer hardware into client operations.

Web Development Teaching Assistant, Universidad de los Andes

Bogotá, Colombia · Remote | May 2023 – August 2023

- Co-led a React and Node.js bootcamp delivered in partnership with the Bogotá City Hall.
- Designed hands-on projects and exercises reinforcing UI/UX and code-quality best practices.

PROJECTS

Finny — Personal-finance SaaS · NestJS, TypeScript, PostgreSQL

- Backend-first personal-finance assistant (in development) exposing accounts, transactions and budgeting through a clean API.

Rick & Morty Explorer — React, TypeScript, Node.js, GraphQL, Redis · [code](#)

- Custom GraphQL API (Apollo Server) with Redis caching; Node/Express backend with a React front end.

Analytics Tasks Manager — React, Node.js, Express, Sequelize, MySQL, JWT

- Full-stack task manager with JWT authentication and a per-user analytics dashboard over task activity.

EDUCATION

B.Sc. in Computer and Systems Engineering

Universidad de los Andes, Bogotá, Colombia | 2020 – 2025
